Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • I want to make meaningful professional connections. • I don't know how to start a conversation. • I hope to leave a good first impression.	THINKS • What should I talk about? • Will people find me interesting? • I don't want to say something incorrect.
PERSONA NAME Student Attending a Professional Networking Event	
DOES • Attends networking events and seminars. • Searches online for conversation ideas. • Tries to learn about current industry trends.	FEELS • Nervous before approaching new people. • Anxious about starting conversations. • More confident when prepared with relevant topics.
