Solution Architecture Diagram:

Provide a high-level visual representation of your solution's architecture. Use the structural layout below as a template to map out your Presentation Layer, Application Layer, and Data Layer. Fill in the specific technologies and components for your project directly into the boxes to create your architectural diagram.

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
Presentation Layer	Provides the user interface where users enter event details, generate conversation starters, view history, and submit feedback.	Streamlit
API Gateway	Receives requests from the frontend, validates inputs, and routes requests to the appropriate backend services.	FastAPI, Uvicorn
Microservices	Performs event analysis, conversation generation, fact checking, history logging, and feedback management.	Python, FastAPI
Database / Data Layer	Stores conversation history and user feedback in JSON files, and retrieves verified information from Wikipedia.	JSON Files, Wikipedia API
