

Scalability & Future Plan

Date	04 July 2026
Team ID	XXXXXX
Project Name	Personalized Networking Assistant
Maximum Marks	1 Mark

Scalability & Future Plan:

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Limited personalization based on user history	Recommendations may not fully adapt to individual networking styles	High
2	Local JSON-based storage	Not suitable for large-scale multi-user environments	Medium
3	Basic authentication and security	Increased risk when deployed for public access	High

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Supports limited concurrent users	Deploy on cloud infrastructure with load balancing
2	Data Storage	Local JSON files for history and feedback	Migrate to PostgreSQL or MongoDB database
3	Performance	Uses DistilBERT and GPT-2 Small	Integrate larger transformer models and optimize inference

4	Security	Basic access controls	Implement JWT authentication, HTTPS, and role-based access control
---	----------	-----------------------	--

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 1	Advanced user profiling and personalized recommendations	1-2 Months	More relevant conversation suggestions
Phase 2	Mobile-friendly application and responsive UI	3-4 Months	Improved accessibility across devices
Phase 3	Integration with LinkedIn and professional event platforms	5-6 Months	Enhanced networking opportunities
Phase 4	Multi-language support and advanced generative AI models	6-12 Months	Wider adoption and improved user experience
